

AMERICAN
SPEECH-LANGUAGE-
HEARING
ASSOCIATION

Resources

Current Procedural Terminology (CPT) Codes - The American Medical Association (AMA) developed CPT codes to provide a uniform language that will accurately designate medical, surgical, and diagnostic services, such as those provided by audiologists and speech-language pathologists.

Healthcare Common Procedure Coding System (HCPCS) - Level II HCPCS National Codes were developed by the Centers for Medicare and Medicaid Services (CMS) for reporting most medical services and supplies, including hearing aids and speech generating devices, provided to Medicare and Medicaid patients and by most private payers.

International Classification of Diseases, 9th Revision Clinical Modification (ICD-9-CM) - The intent of ICD-9-CM is to standardize disease and procedure classification throughout the United States. The ICD-9-CM is recommended for use in all clinical settings but is required for reporting diagnoses and diseases to all U.S. Public Health Service and Centers for Medicare and Medicaid Services (CMS) programs.

A copy of the CPT, HCPCS, and ICD-9-CM se coding systems can be obtained from:
